MAS in Oral Implantology

Curriculum

The Master of Advanced Studies (MAS) in Oral Implantology comprises 60 ECTS credits, made up of three components: classroom and hybrid teaching (40 ECTS), clinical case documentation (10 ECTS) and the master thesis (10 ECTS).

Curriculum structure

	Component	ECTS per semester	ECTS total
1	**Classroom and hybrid teaching**		**40**
a)	**Evidence-based theoretical education in the fields of implant dentistry, reconstructive dentistry, periodontology and oral surgery**		**12**
a.1	Structured lectures (seminars) on various topics (implantology, reconstructive dentistry, periodontology, related topics)	1	6
a.2	Study of selected literature with guided discussion, related to the lectures	1	6
b)	**Practical and hands-on training in the fields of implantology and reconstructive dentistry**		**21**
b.1	Case discussions in small groups with one of our faculty members: presentation, planning and discussion of patient cases	1	6
b.2	Workshops with hands-on exercises and clinical observation of surgical procedures with teaching by experts	1	6
b.3	Practical and theoretical continuing education courses, four days per year		3
b.4	Participation in professional excursions and in one international congress per year		6
c)	**Fundamentals of scientific work in dentistry with a focus on implantology**		**7**
c.1	Fundamentals of scientific work including statistics		6
c.2	Protocol development		1
2	**Clinical case documentation** Preparation and documentation of 6 cases, case presentations, epicrisis		**10**
3	**Master thesis** Publication of a clinical/preclinical study, review paper or case report		**10**
	Total		**60**

Thematic modules

Six thematic modules, each combining practical workshops, case presentations, lectures and literature seminars:

- Partially edentulous patients – posterior zone
- Partially edentulous patients – anterior zone I
- Partially edentulous patients – anterior zone II
- Fully edentulous patients
- Battle of concepts
- Maintenance and alternatives
